**CEILINGS OF THE NEW US BANK STADIUM  
FEATURE MADE IN MILWAUKEE  
ABOVE VIEW INC. CEILING TILE**

The city of Minneapolis and their NFL team the Minnesota Vikings will be introducing their new stadium, The US Bank Stadium, when they play the Green Bay Packers on Sunday night. Above View Inc. of Milwaukee, WI contributed in the construction of the new stadium by providing decorative ceiling tiles for the stadium. ABOVE VIEW Ceiling Tiles grace the swanky interiors of the Valhalla and Norseman suites and Corridors. HKS Dallas, specified two tile patterns for the project, The Contemporary Coffe Ceiling Tile (TL-0013) and Wedge Ceiling Tile (TL-0060). The ceiling Tiles are enhanced with LED lighting in these rich modern interiors. Above View's plaster and glass fiber ceiling tiles provide a custom look and add dimension to the ceiling plane. In addition to the exquisite design options, ABOVE VIEW ceiling tiles are popular for larger projects, because they can easily accommodate recessed lighting, cameras, sprinklers, vents etc. required for commercial spaces.

Other recent projects HKS, Dallas, has relied on Above View ceiling solutions include, The Verizon Center, Washington DC, TCU Amon G Carter Stadium, Fort Worth, TX, and The Kay Bailey Hutchison Convention Center Dallas.
