NEWS AND VIEWS

Featured Project: Casa Caballeros

Natural light streaming through a continuous skylight and glass door emphasizes the Gothic Tegular tile's dimensionality.

Above View's [Gothic Tegular Ceiling Tile \(TL-0067\)](#) adds pattern and texture to the bedroom wall.

Architect Jill Lewis found Above View Inc through an online search for "Gothic Tiles." She creatively envisioned mounting the [Gothic Tegular Ceiling Tiles](#) on a wall to lend "gorgeous visual texture to the entry" of the vacation home she was designing for her family in Palms Springs, CA. Jill reached out to inquire if Above View ceiling tiles could be wall mounted. The answer was "absolutely" as Above View's offices have many walls featuring our artisan GRG designs.

The quatrefoil pattern of the Gothic Tegmental Tile complements the floor tile and the Above View products "convey a sense of craft that is both luxurious and rare, while very easy to install," according to Jill. The tiles were mounted to the wall with counter-sunk screws and then simply patched with Spakle. After seeing the successful installation of the entry feature wall, Jill ordered additional tile for a bedroom wall.

In contrast to the sleek modern exterior, Jill weaves traditional and modern design influences from around the world in the interior. Grey, white and black patterns and textured surfaces provide a welcoming playfulness. For Jill, Above View's Gothic Tegmental Tiles are a "perfect solution for creating a unique wall feature with traditional appeal, yet applied in a totally modern way that will surely remain timeless for years to come."
