Above View Inc. Debuts
ACOUSTICS
May 1, 2017

Above View Inc. is proud to introduce **ACOUSTICS**, a ceiling tile collection offering both **STYLE** and **PERFORMANCE**. Two innovative contemporary 2' x 2' designs will be introduced at HD EXPO in Las Vegas, May 3-5, 2017. Designed to absorb and reduce sound, the **Diamond Sound Screen** and the **Deco 2 - Square Acoustic** ceiling tiles are the first acoustic products to be developed by Above View. Additional designs will be added to Above View's Acoustic Collection in coming months.

The Diamond Sound Screen Ceiling Tile (TL-0200) offers a sophisticated open diamond pattern and sound-reducing performance. This plaster and glass fiber (GRG) ceiling tile is designed to fit into either a 15/16" or a 9/16" commercial ceiling grid and is backed with a sound-absorbing material to achieve an NRC of .55.

The Deco 2 - Square Acoustic Ceiling Tile (TL-0210) offers both noise-reduction and decorative flair. Designed for a 15/16" commercial grid, this 2' x 2' plaster and glass fiber ceiling tile includes a sound-absorbing center insert, producing an NRC of .55. While inspired by Art Deco Style, this intricate geometric design is suitable for a range of contemporary interiors.

Headquartered in Milwaukee, WI, Above View Inc. is a favorite source for artisan ceiling tile. Above View ceiling tiles are found in hotels, casinos, restaurants, courthouses, stadiums and convention centers worldwide. Made in USA since 1984.
